WORK EXPERIENCE

Senior Software Engineer

(Present)

Al Rafay Consulting, Karachi

- Developed a high-impact company portal as a React developer, earning significant recognition and appreciation for my innovative approach and execution.
- Demonstrated expertise in SharePoint Framework by creating numerous web parts for clients, showcasing versatility and technical proficiency.
- Assisted junior developers in resolving complex issues, fostering a collaborative environment and enhancing overall team productivity.

React Developer / Mid-Level

(1.4 years)

Mentor Health Pvt. Ltd, Karachi

- Received praise from all stakeholders for creating user-friendly and efficient portals that significantly increased productivity, reduced errors, and enhanced overall satisfaction.
- Received recognition from company executives for creating a visually appealing and user-friendly website that effectively showcased the brand's products and services.
- Received positive feedback from both doctors and patients for creating a seamless and secure online platform for virtual consultations, leading to increased adoption and utilization of telemedicine services.

React Developer / Junior-Level

(1.5 years)

Mutex Systems Pvt Ltd, Karachi

- Identified and resolved interface software issues, conducting thorough debugging of application codes to enhance functionality and optimize performance.
 - Designed and executed front-end architecture with precise adherence to user interface concepts, ensuring flawless implementation.
 - Implemented cutting-edge user-facing features with React.js, while also constructing reusable components to enhance scalability and efficiency for future projects.
-

EDUCATION

Bahria University (Karachi Campus)

2016 – 2020

Bachelors in Information Technology (BS-IT)

PROJECT ACHIEVEMENTS

BioMed Realty – Contract Automation Portal

- Designed and developed a comprehensive portal for a real estate company using React.js, enabling complete contract lifecycle management. Integrated detailed phase analytics and streamlined contract administration while ensuring performance optimization for seamless user experience.

Asset Management Portal – SharePoint Webpart

- Created an asset management portal on SharePoint using SPFx, allowing comprehensive tracking and management of all building assets

Manager Checklist – SharePoint Webpart

- Developed a SharePoint web part using SPFx that enables managers to view and analyze daily task checklists of their employees, tracking status, completion progress, and performance metrics.

BioMed Realty Lease Abstract (For Legal Department) – SharePoint Webpart

- Developed a SharePoint web part using SPFx for the legal department, enabling users to upload PDFs, which are then processed by an AI workflow to extract key details, simplifying complexity and saving time. Users can manipulate the extracted data on the frontend to generate and send a new PDF, streamlining departmental operations.

Mentor Health – Mini Application

- Developed a mini web application using React that effectively clones the functionality of the company's mobile app, ensuring seamless user experience across platforms.

Mentor Health Website (Revamp)

- Revamped the website on WordPress to enhance user interface and experience, implementing modern design principles and intuitive navigation to improve overall user engagement.

BioMed Realty – Contract Generator

- Developed a dynamic web platform for automated legal and business document generation including change orders, purchase orders, service agreements, and construction contracts. The system allows users to fill key requirements through smart forms and instantly generate professionally formatted Word documents, streamlining contract creation and approval workflows.

Mentor Health – Agent Portal

- Developed a sales portal for corporate agents to sell medical services, streamlining the sales process and driving revenue growth by incentivizing agents.

Mentor Health – Finance Portal

- Developed a comprehensive portal for the company's finance department, incorporating functionalities that streamline financial operations, enhance data management, and facilitate real-time financial analysis and reporting.

Mentor Health – Partner Portal

- Developed a robust portal for Mentor Health's partner companies, providing seamless access to resources, streamlined communication, and comprehensive tools for managing collaborative health initiatives.

Cubes & Dots Website

- Create a visually captivating digital agency website with React.js, emphasizing intuitive navigation. Utilize Node.js for seamless form handling and email notifications, optimizing client communication.

Mentor Health – Pharmacy Portal

- Create a streamlined portal for pharmacies, labs, and appointment booking, integrating inventory management, lab processes, scheduling, and rider tracking for optimized operations.

Mentor Health – Doctor Portal

- Develop a portal for doctors to conduct online consultations and manage prescriptions efficiently, leveraging the Agro toolkit for seamless call interactions. Integrate the Mentor Health app for direct patient calls, ensuring smooth communication. Access electronic medical records for accurate diagnosis and treatment.

POS ERP System for Restaurants & Marts

- Improving the user experience and design of the systems along with the API integration.

PIMS Doctor & Patient Portal

- Given the responsibility of developing a user interface, convert AdobeXD design into the live portal.

MoosNClucks Food Ordering Website

- Revamp the food ordering website from scratch using React.js, enhancing both design and functionality for an improved user experience.

Totali-me (Ecommerce base website)

- Convert the AdobeXD design into the Development phase complete phase 1 of the project according to the client requirements

Mutex Systems Pvt Ltd. Website (Revamp)

- Completely overhaul the website's architecture, transitioning from PHP to React.js for enhanced performance, interactivity, and scalability.
